Hand Shears

Hand shears are designed for cutting steel-wire rope with diameter up to 8 mm when removing security seals of power types from locking groups of wagons, containers, hatches, tank cisterns, vans and other objects.

Construction Design:

Hand shears have construction design of double-lever type which anticipates changing of cutting ends. They are designed for cutting steel wire-ropes (GOST 3067-84, GOST 3070-88) and binding low-carbon steel wire for general purposes (GOST 3282-74). Spare ends are included into the set.

Technical Characteristics:

Maximum diameter of wire-ropes being cut	Maximum loading on shafts	Mean life	Length of shears	Mass of shears
8,00 mm	max. 20 kg	2000 cuttings	580 mm	2.0 kg
