Nail Nippers

Nail nippers are designed for cutting-to-length of metallic rods, wire and bars of power security seals when removing them from locking groups of covered trucks, hoppers, tanks, containers, vans, storage rooms, storehouses and other objects.

Construction Design

Nail nippers have typical construction design with double-lever mechanism equipped with arresting device of cutting ends. Cutting ends of nail nippers have single-ended grinding, and they are made of special structural steel, that allows increasing its working time considerably. All the nail nippers have individual sequential production number. Ordering spare ends is possible.

Technical Characteristics:

Maximum diameter of rods being cut		Maximum loading on shafts	Length of nail nippers	Mass of nail nippers
With surface coating up to HRC 46-52	Without surface carburizing			
10 mm	12 mm	26 kg f.	800 mm	4.5 kg
